ATTENTION: This email came from an external source. Do not open attachments or click on links from unknown senders or unexpected emails.

Heather,

Off site is actually out of state. This year we are going to North Carolina for the training. We do not do the training locally. Additionally the "Training Area" is incorrectly named. It is where the nozzle testing was performed. We don't do live fire training here at Stewart.

Have the water analysis results come in yet? The guys said it would be about 2 weeks.

Nic

Jody,

I have a question about the training area described in the Stewart Perfluorinated Compounds Preliminary Assessment Site Visit Report for New York Air National Guard Stewart Air National Guard dated February 2016.

Within the PA the ANG indicates that training activities were performed "off- site". This explanation is used to justify some of their recommendations and conclusions in the report. I'm looking for information as to where the "off-site" training area is and if the ANG will include this area in future sampling efforts. We suspect it could be on the adjacent International Airport property (which we believe is owned by the NYS Dept. of Transportation and operated by the Port Authority of NY and NJ).

Please let me know if you need more information or have any questions. Thanks-Heather

Heather Bishop
